7. The same year, the American Journal of Public Health released an exhaustive look at thirty-three years of data on suicides and gender, as well as other data, concluding a strong relationship exists between suicide rates in men and women, and the higher level of gun ownership in a state. “Higher gun ownership was associated with higher suicide rates by any means among male, but not among female, persons,” researchers concluded. “For male persons, policies that reduce firearm ownership will likely reduce suicides by all means and by firearms. For female persons, such policies will likely reduce suicides by firearms,” Michael Siegel and Emily F. Rothman, “Firearm Ownership and Suicide Rates Among US Men and Women, 1981–2013,” American Journal of Public Health (July 2016), <https://ajph.aphapublications.org/doi/abs/10.2105/AJPH.2016.303182>.

13. Some ask whether “active shooter” should also include incidents committed with knives, bombs, or cars. These incidents are even rarer and can skew research efforts involving firearms. This is also why many researchers, including those at the FBI, exclude gang and domestic violence shooting in their methodology. Gangs and domestic violence research efforts abound. The FBI’s goal was to do research on incidents that only fit into this uniquely frightening public phenomenon and the methodology is provided in detail in its study. See Blair and Schweit, “A Study of Active Shooter Incidents,” appendix B.
14. The FBI continued its annual tallies, but we were left wanting a downturn. In the six years since that research was released, this country now averages two shootings a month, about a shooting every fifteen days. For US-based incidents, the FBI counted twenty annually in 2014, 2015, and 2016. The number rose to thirty in 2017, twenty-seven in 2018, and twenty-nine in 2019. (Law enforcement records from the Las Vegas Metro Police Department include two witnesses' reports stating that the assailant made references indicating a political goal shortly before the attack in Las Vegas—in particular that "somebody has to wake up the American public and get them to arm themselves" because the United States government would "confiscate guns." While not addressing or refuting these accounts, the Federal Bureau of Investigation Behavioral Analysis Unit ultimately determined that "there was no single or clear motivating factor" for the attack. Due to this conflicting information, we included the attack in the GTD and classified it as "doubt terrorism proper.")

## CHAPTER THIRTEEN SOURCES

**Ready.gov** site: [www.ready.gov/active-shooter](http://www.ready.gov/active-shooter).

**FBI** at [fbi.gov](http://fbi.gov) and search “active shooter resources” Look here: [www.fbi.gov/about/partnerships/office-of-partner-engagement/activeshooter-resources](http://www.fbi.gov/about/partnerships/office-of-partner-engagement/activeshooter-resources), and [www.fbi.gov/survive](http://www.fbi.gov/survive). The study posted there, “A Study of Active Shooter Incidents in the United States Between 2000 and 2013,” is so heavily relied upon that the Government Printing Office has it in their annual catalogue, and Amazon sells a Kindle edition if you need it.

**US Department of Justice’s Office of Justice Programs** coordinates research and resources as well as information about research that is underway. Its National Institute of Justice funds grants for academic, nonprofit, and faith-based organizations, and even individuals who want to conduct research. Look here: [www.ojp.gov](http://www.ojp.gov).

**Bureau of Justice Assistance** grants are awarded for innovative, evidence-based strategies and collaborative efforts by state, local, and tribal, private and public entities seeking ways to prevent crime and protect communities. **National Center for School Safety** at <https://www.nc2s.org/>. The National Center (NC2S) is a federally funded clearinghouse for all things having to do with school safety; it crosses over, and is supported by, several other public and private organizations, including some listed below as well as the University of Michigan, Michigan State University, the University of Virginia, the National Council on Behavioral Health, Sandy Hook Promise, Schweit Consulting LLC, and national school superintendent and principal organizations. Created in 2018 and funded by the US Department of Justice, Office of Justice Programs, Bureau of Justice Assistance, NC2S resources bring rigorous academic research together with practical experience and best practices.

**Safe2Tell.org** at <https://safe2tell.org/>. Susan Payne and her team created Safe2Tell.org initially to build an anonymous place for parents, students, teachers, school administrators, and law enforcement to share information and leave tips. The impetus was both the Columbine High School massacre and the staggering reality that 80 per-cent or even 90 percent of the time, someone other than the attacker knew violence was going to happen but failed to report it.

**Train4Safety.org** at <http://train4safety.com/>. Creators of Train 4 Safety believe even the youngest can be better prepared but know that often disaster preparedness is designed only for adults. Disaster affects everyone, even preschoolers. The mission of Train 4 Safety is to use fun and engaging stories to teach children how to stay safe and be prepared.

**Everytown for Gun Safety** at <https://everytown.org/>. Everytown for Gun Safety advocates for issues centered on gun safety and gun access. The heart of the organization centers on a “Moms Demand Action” component advocating within their own community. The organization was created in 2014 when Mayors Against Illegal Guns and Moms Demand Action for Gun Sense in America came together to address gun violence.

**American Red Cross** at <https://www.redcross.org>. The Red Cross has a free active shooter PowerPoint slide deck of training materials you can review on your own and provide to your family, organization, business, or school at <https://www.readyrating.org/Resource-Center/Active-Shooter/acat/1/tag/active-shooter-training>. You can also find extensive materials and courses in English and Spanish to train yourself, your congregation, or your employees in first aid, AED use, and CPR.

**National Safety Council** at <https://www.nsc.org/>. The 100-year-old Council advocates reducing risk at work, in homes, in communities, and on the road. The Council site is filled with tools and resources to share and educate the reader. Look here: [www.nsc.org](http://www.nsc.org). Free active shooter presentations and other materials are available here: <https://www.nsc.org/safety-training/workplace/emergency-preparedness>. The site is so thorough they even have the advertisement flyer so you can post it in lunchrooms and on bulletin boards to announce the training.
